### Strategy

The objective of this sub-fund of the MFM FUND is to replicate as closely as possible the rising phases of the benchmark index while reducing risk during periods of decline. To achieve this, behavioural finance parameters are used to optimise both the timing of specific and sector-related decisions and the strategic allocations.

### Fund Facts

Fund domicile: Luxembourg  
 Fund Authority: CSSF  
 NEW ISIN from 06.05.15: LU1105777707

### Fund manager comment

The whole month of March has been very strong. Moreover, this nice performance has come with one of the lowest volatility for more than 10 years. Expected volatility has been constantly much higher due to the French election fears, but contrary to the consensus the market has shown strong resilience with increased inflows.

As expected, the fund was well positioned for a renewed wave of sectors rotation. The increased weight in the defensive sectors has brought good profits for the fund with a monthly performance of 4.28 % vs 5.46 % for the benchmark. Taking into account the fund's very low level of risk (30 days volatility of 5.7%), it is clearly satisfying.

The asymmetric portfolio profile continues to be managed very tightly and we are ready for any adverse development, which is still the main scenario for the end of the 1st semester.
