Fund Manager's Comments

April 2015 saw a strong correction in US dollar and European stocks. Meanwhile, the MSCI World (USD) was up 2.16% for the month, the HFRX Equities Hedge Index was up 1.19% and the MFM Global Thematic Fund (USD) was up 2.67%. The Fund maintained a low net long exposure to Equities last month. As we are currently focusing on capital preservation, the gross exposure of the fund has been low since inception, staying around 65%. Our focus was mainly on the short themes recently as we are waiting to increase some long themes on market pullbacks. We added a new short theme which is called "increased competition in Swiss Telecoms". Indeed, we believe that Heidi land will see more competition going forward. Swisscom and Sunrise are both trading at a premium today while enjoying higher pricings than their European counterparts. We see Cablecom's move into mobile as a larger threat than the market thinks as their offering is very attractive. Then, we believe that Xavier Niel has done a good job with the rebranding of Orange into Salt and that he will come up with more news soon like entering the internet space or fixed offerings. We published an article in French in the AGEFI last month that you can access [here](#). Finally, we tend to agree with the old polish proverb which says: "Without salt the feast is spoiled".
