Fund Manager's Comments

The Fund was up 3.27% in June while our benchmark was down -1.08%. We raised our net market exposure to 34.6% after buying some European names on the Brexit day and by covering our UK short Real estate basket which was down significantly. Now that the UK has voted to leave the European Union, the process of negotiating the exit will begin. Considering that it took Greenland three years to negotiate its exit from the EU, how long will it take for the UK? What the eventual terms will be and the impact on investments and business confidence? The campaign to leave the European Union repeatedly urged Britain to "Take back control". It is now a week since voters narrowly opted for Brexit, and the country has seldom looked so wildly off the rails. The prime minister has handed in his notice. The 2 leaders of the opposition just resigned. The pound hit a 31-year low against the dollar and banks lost a third of their value, before stabilizing. Meanwhile there is talk in Scotland and Northern Ireland of secession. Will the Butterfly effect slow down? We have no answer yet and will continue to look for cheap international investment opportunities and themes.
