PORTRAIT

Giordano Colombi

Portfolio Manager

I am a mathematical engineer with expertise in data-driven decision making and in modeling Machine Learning systems.

My responsibilities include portfolio optimization, portfolio construction, and conducting quantitative research.

A QUICK BACKGROUND

I collaborate closely with fund managers, providing quantitative models for our investment strategies.

I WORKED AT

- L2F - Machine Learning Engineer Intern

- AELER Technologies - Data Scientist and Product Owner.

MY PASSIONS

Racket sports

Playing chess

Travelling

WHAT I'M PROUD OF

I've visited more than 20 countries in 4 different continents. Every trip is an exciting blend of adrenaline and unexpected discoveries.

Traveling also means being ready to handle the unforeseen, just like in investments, where it's crucial to be prepared to manage unpredictable situations.

FUN FACTS

1

NEVER GIVE UP

Even Ethan Hunt from Mission Impossible would call me for advice! For me, there is always a solution to every problem.

2

I LIKE TO DISCUSS

Born Italian, it's kind of normal !
I love participating in deep conversations where I share my ideas and experiences with enthusiasm.

3

I LIKE CHALLENGES

I always seek new challenges to thrive on the adrenaline provided by difficult tasks or situations. Recently, I have been training for the Lausanne 20 km run.
